Canin Associates' Landscape Architecture and Architectural Design Studios teamed together to design the Milagro del Mar Beach Resort, located within the Gran Pacifica Beach and Golf Resort on the Pacific coast of Nicaragua. Inspired by the Spanish-Colonial architectural style, the resort includes a five-story main building, two four-story condominium building and a village with 26 one- and two-story casitas. All buildings have been oriented toward the view of the ocean and the central cascading waterfall feature. The resort also features a private exercise facility, beachside restaurant, two feature swimming pools, green spaces, walking paths, fountains, and pavilions in a picturesque village setting.
