## Canin Associates Designs Habitat for Humanity Homes

**Orlando, Florida (November 2007)** The Architectural Design Studio of Canin Associates has been selected by Habitat for Humanity to design new front elevations for existing floor plans to be used in upcoming projects in the Orlando area. This opportunity echoes Canin Associates' recent trend of rehabilitating stagnant elevations for production home builders in a slow housing market. The Canin Associates team designed cost-effective elevations that maintain curb appeal through the rich character of Craftsman, Traditional and Mediterranean architectural styles. Dee Danmeyer, Executive Director and Wallace Miller, Board of Directors were extremely pleased with the results and effort put forth by Canin Associates.

### About Us

**CANIN ASSOCIATES** is an interdisciplinary design firm of planners, landscape architects and architects in Orlando, Florida with a track record spanning 27 years. The firm is comprised of idea-based professionals committed to creating sustainable communities and environments that enrich the quality of life treasured by current and future generations.

Canin Associates believes in **designing great people places** and this philosophy is integrated into all design concepts. The firm aspires to design places where people can relax, enjoy renewal of spirit and energy, where they can celebrate and rediscover simple pleasures and connect with family and friends.
