client

london & regional panama

After establishing a focused direction for creating value through quality urban design at the new city of Panama Pacifico during an initial design charrette, the Canin Associates team is focused on delivering that vision in a wide array of planning and design services for London & Regional Panama. The project entails every aspect of planning and design and the creation of great people places. Our team is involved at every level from large scale strategic land development scenario planning to park and open space design, to new residential product designs, to detailed specifications for wayfinding signage. The project is a showcase for 21st century development in an international setting and will provide the Country of Panama with an expanded economic development base and room to grow on the west side of the Panama Canal for years to come.
